ALLEGHENY, MICHIGAN

"VICTORY PLANTS," The Prestige Strain of Michigan-grown Nursery Stock

THE ALLEGHENY NURSERY

A COMMON-SENSE CATALOG AND PRICE LIST.

Just a Little Talk.

Our little business may induce you to order and try, etc., to no. If not, I trust that you are fortunate and may be successful in your efforts in other directions.

The matter of buying your plants may seem small and unimportant to you, yet it is a very important task, so much depends upon the plants you grow. No matter how good or fine your soil and climate, the success or failure of your effort will depend largely upon the plants you can afford to turn out at a reasonable price and sell.

We grow a limited supply of this fruit this year, taking the country as a whole. We do not attempt to grow a large assortment of varieties, but concentrate upon those we believe best adapted to the climate and soil conditions of the region. We believe these varieties will prove hardy and productive and when properly managed will give the best results.

Our prices are very reasonable, and our stock is of the highest quality. It should be so. Really the pictures that many plants are sent to the market are not even suited to small customer or nursery man. Most pictures are not of the best and cannot be of the best if you are tried to use it. One of my customers says he has found the prices of our nursery stock too high for him to buy it and plant of the plants he has ordered and received from us have not been satisfactory, but I am sure that you will be satisfied with the products of our nursery stock. It is true, prices and qualities are often compared, but prices are more often what counts.

HINTS

(variety and culture) - Varieties of Strawberry Plants: The strawberry is a member of the genus Fragaria, in the family Rosaceae. This plant is significant to gardeners as it is hardy, productive, and easy to grow. It produces a wide variety of fruits, including strawberries, raspberries, and blackberries. There are many different varieties of strawberries, each with its own unique characteristics and qualities. It is important to choose the right variety for your particular climate and soil conditions.

CARE IN PLANTING: The strawberry plants should be planted in a well-drained soil with plenty of organic matter. The plants should be planted in the spring or fall, with the roots just covered with soil. The plants should be spaced 12-18 inches apart, depending on the variety. The plants should be watered regularly, but not too frequently, to prevent the roots from becoming waterlogged.

CARE AFTER PLANTING: Once the plants are established, they should be watered regularly, but not too frequently, to prevent the roots from becoming waterlogged. The plants should be mulched with compost or straw to help retain moisture and discourage weeds. The plants should be pruned in the fall to remove dead or diseased foliage.

CULTIVATION: The strawberries should be fertilized with a balanced fertilizer in the spring and fall. The plants should be watered regularly, but not too frequently, to prevent the roots from becoming waterlogged. The plants should be mulched with compost or straw to help retain moisture and discourage weeds. The plants should be pruned in the fall to remove dead or diseased foliage.

STANDARD JUNE Bearing Varieties:

Armstrong (A) - One of the finest strawberries known, as its name signifies, this variety bears large, firm, red berries with a sweet, delicate flavor. The plants are strong growers, with a large, spreading habit. The berries are borne early, and are excellent for both table and canning.

Big Lulu (Kellogg's S.) - Name as Big Joe (Candy), it is a large, sweet, juicy berry, with a firm, thick skin, and a delicious, rich flavor. The plants are vigorous and productive, and the berries are borne early. The berries are excellent for both table and canning.

Very Big (Sundog) - A large, sweet, juicy berry, with a firm, thick skin, and a delicious, rich flavor. The plants are vigorous and productive, and the berries are borne early. The berries are excellent for both table and canning.

**PRICES**

- We have grown this variety for five years and find it a most worthy variety and one that is steadily increasing in demand. It is always advisable to plant early and several times if your orders are large, so that you may have plenty of fruit when wanted. We should be properly stocked with this very late berries, as they will do just as well in Illinois as in Michigan, or any other part. In plant growth it is fine, and is a good staple variety, and always does well, no matter where grown. It is a very profitable variety for a good shipping variety, and always pays handsomely. We have used this variety for the past four years and have been satisfied with it. We have not grown Kellogg Prize, get some now before the orders are gone.

- Dr. Burrill — Very similar to Senator S. — A very strong grower and heavy cropper. Dr. Burrill is fully in accord with the writer in his estimate of the merits of this variety. It is good for canning and very delicious to eat the fresh berries. In a dry blooming season its long blooming season makes it good for planting your flowering sorts.

- Kellogg’s Premier — The very best of all extra-early varieties. I have never seen anything to equal it. Berries are large, beautifully formed, bright red through and through. It is delicious in flavor and a splendid shipper. I have fruited it three years and consider it my money maker of all early varieties. It produces a very heavy crop and you should plant heavily, whether growing for home use, local market, or the shipping trade. It will Avail you in the future if you have a good order. We have used it in the past few years and it has been very profitable.

- Howard No. 17 — A very new variety from the late President Wilson. It is one of the most promising of our next generation as follows: ‘The best fancy strawberry of all time.’ It is the finest variety of the season and the berries are good. It is of the same color shade and the color much the same, possibly not quite so dark.
The Aligean Gentleman (8)—This new variety is now abundant on our markets, the past five years and its behavior is so astonishing, and so far depending on our best experience to the public. We will not go into details concerning the other varieties, but we are certain that this variety has a beautiful, easy appearance. It begins to bear in May. Both continue later than the Apple. The plant will be ornamental, with fruits and leaves at the same time, even after ripening time. The leaves of both Chinese pears do not grate so distinctly in color, but a much better one in the variety and, of a decided new and pleasing quality. Each sale is made with the understanding that we reserve all of its habit for two fruiting seasons. We offer to sell the variety at $2.50 to a customer for $1.00 paid. We pay no returns on this variety except the rights of the copyrighted name, "The Aligean Gentleman."
GLADIOLI.

Auranti—Pure flesh pink, four for 25c; ten for $1.00.

Aurea—Peach flesh, white and antique red, four for 25c; ten for $1.00.

Bicolor—Bicolor pink and white, four for 25c; ten for $1.00.

Bicolor—White and red, four for 25c; ten for $1.00.

Bicolor—White and red, double (flat), four for 25c; ten for $1.00.

Francesco, double, crimson pink, each.

Gibert, double, black, Sendhus crimson, 50c; each for $1.00.

Maxima—All the above colors and many others, mixed, in burlap bags 50c; ten for $1.00.

THE FOUR POPULAR CLEMATIS.

Clematis Polyanthus—In flower in August and September. Scarlet, glowing crimson, bright red, purple, blue and white. A great mass of beautiful flowers; will cover walls with color.

Clematis Paniculata—Large, star-shaped flowers, white, pink, scarlet, crimson, blue, in abundance. A great mass of beautiful flowers; will cover walls with color.

Clematis Jackmanii—Large, flower in tenon, white, yellow, crimson, scarlet, crimson. A great mass of beautiful flowers; will cover walls with color.

Clematis Ramboulet—Large, star-shaped flowers, white, yellow, crimson, scarlet, crimson. A great mass of beautiful flowers; will cover walls with color.

Potted trees.

Fruit trees offer the best opportunities for early results. War, labor, general shortage, drought, and lack of food for the past several years, has caused many nurserymen to quit extensive propagating. The present scarcity of all fruit trees and plants is the natural result. Our supply is large, and the quality of the stock is excellent. The best rooted stock we ever sold—"you will never find a more business-like stock for the money."

APLIES.

One-year-old trees, 4 to 5 ft, 50c each; 25 for $1.00.

Two-year-old trees, 4 to 6 ft, 55c each; 25 for $2.00.
